💼 WORK EXPERIENCE

2020 - Current

SENIOR PRODUCT DESIGNER Varonis varonis.com

Data security platform | Temporary position

Enhanced the company's security features as part of the UX team. Analyzed customers' needs, sketched out wireframes, designed the overall look and feel, and ensured a great user experience. Concurrently, I supported the Product Management and R&D teams throughout the product life cycle.

2019 - 2020

SENIOR PRODUCT DESIGNER Bond ourbond.com

Personal security platform

As the sole designer at the Tel Aviv office, I led the end-to-end product lifecycle for both mobile and web platforms. I defined the interactions and interface through prototyping, including user flows, information architecture, sketches, and brand design—all while directly helping the CEO shape the product vision.

2018 - 2019

SENIOR PRODUCT DESIGNER Time To Know

Ed-tech solutions company

Created interactive dashboards and revamped built-in features to meet business goals. To achieve this I conducted brainstorming meetings and sketching exercises, crafted wireframes and constructed prototypes that determined the direction of product design.

2013 - 2017

SENIOR UX/UI DESIGNER Jive Software

Social business software company

Created mobile and web designs, beginning with research and high-level overviews of product goals. Hand sketches and live prototypes allowed stakeholders to get a feel for the concept. I then delivered assets and worked closely with developers on the finished product.

I established a small team of three designers. Additionally, I ensured that the team worked in an agile environment and conducted daily standup meetings, weekly meetings, retrospectives and design critiques.

🎓 EDUCATION

2004 - 2010 Tel Aviv

BA IN HUMANITIES AND SOCIAL SCIENCES

The Open University

2003 - 2007 Tel Aviv
